

Original Polycarbonate™ Snow Guard For Metal Roof Systems

Diamond Texture
Base Option

Overview

Developed by architectural sheet metal professionals, the Original Polycarbonate™ offers 25 square inches of bonding surface - the larger the base, the greater the holding power. The Original Polycarbonate has the largest base available in the industry! Manufactured from clear UV-stabilized polycarbonate material, or in a color that is injected throughout the product and matched to any standard roof panel. Diagonal installation creates a 7" barrier for more coverage per unit on wider panels. **Apply using 3M VHB Tape, tube adhesive, or a mechanical fastening application.**

Innovation

Manufactured from UV-stabilized polycarbonate, the unique design of these crystal-like guards suspends the field of snow until the snow and ice gradually melt under the sun's rays.

CUT: Sno Gem® snow guard's prismatic design was developed by architectural sheet metal professionals with over 100 combined years of on-the-roof experience.

CLARITY: Sno Gem® offers a clear prismatic snow guard which retains its crisp, clean and architectural appeal. There's no metal to rust or stain. Sno Gem® snow guards are unaffected by climate extremes.

COLOR: Sno Gem® snow guards can be matched to all industry standard metal roof colors. Sno Gem® also offers an unlimited amount of custom colors to closely match the metal roof panel. The color is injected throughout the product.

CARAT: The true measure of a gem's worth. At the heart of each Sno Gem® is an engineered, multi-directional, multi-purpose drain opening for melting snow and ice to flow freely, plus heat cables can be easily routed through the opening.
